Q28 National Planning Policy allows communities to "identify and protect green areas of particular importance to them" by designating them in their neighbourhood plans as Local Green Spaces. This designation must not simply be "NIMBY" but must be "consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services." The designation should only be used where the green space (a) is in reasonably close proximity to the community (b) is demonstrably special to the community (c) holds a particular local significance, for example because of its beauty, historic significance, recreational value, tranquillity or the richness of its wildlife and (d) is local in character and is not an extensive tract of land.Taking into account requirements (a) to (d), to what extent do you agree that any one or more of the areas numbered on the map should be protected in this way.
